

CHECKOUT

## Mini-Cart

The Mini-Cart widget gives users a preview of everything in their shopping cart from any page within the site. This allows the user to see all their products and the subtotal without having to navigate to their Shopping Cart.

DESKTOP

### Placement

This widget may be added to the following pages:

-  All pages except checkout

### Parameters

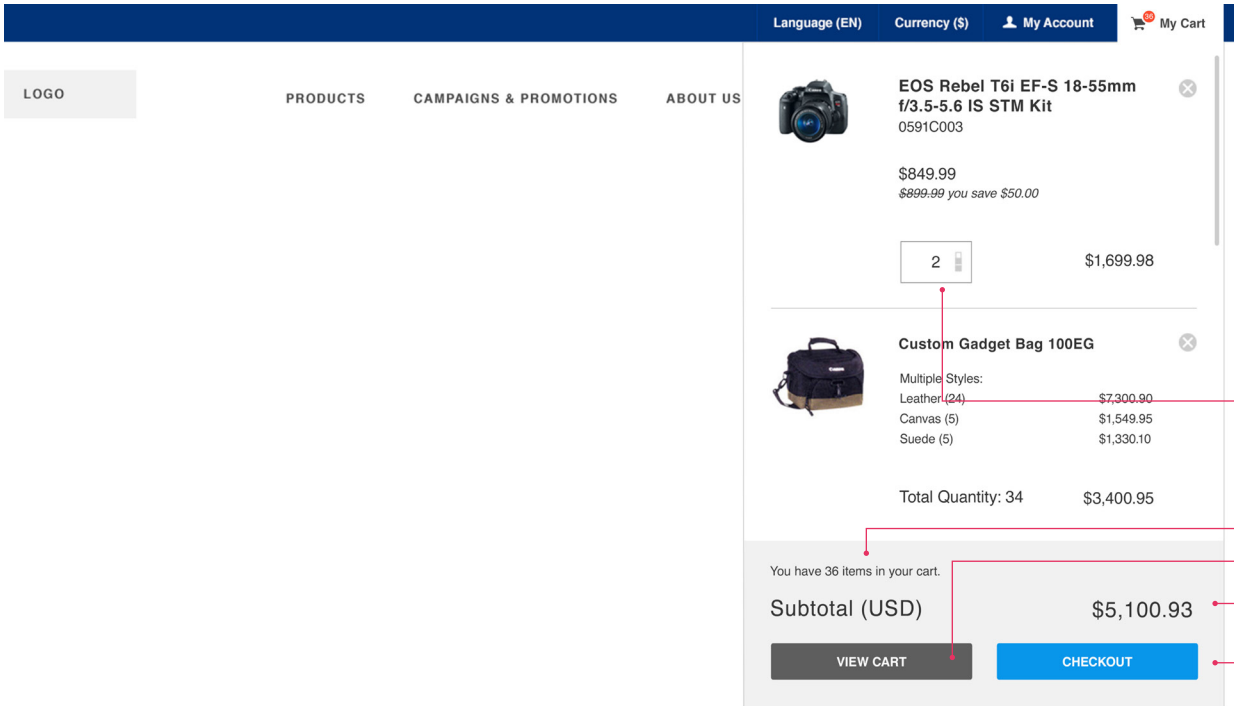

- Mini-Cart is only available for the desktop experience.

CHECKOUT

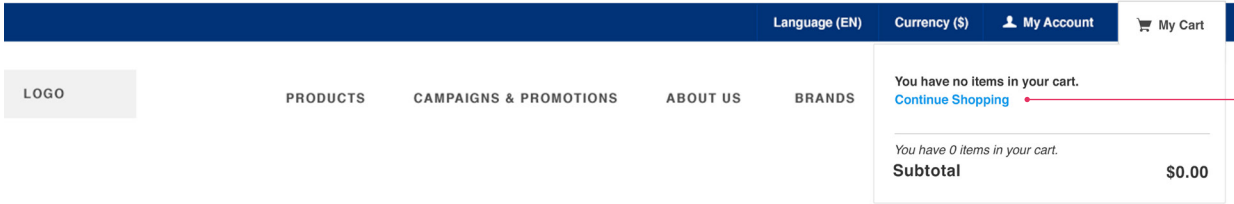

# Mini-Cart

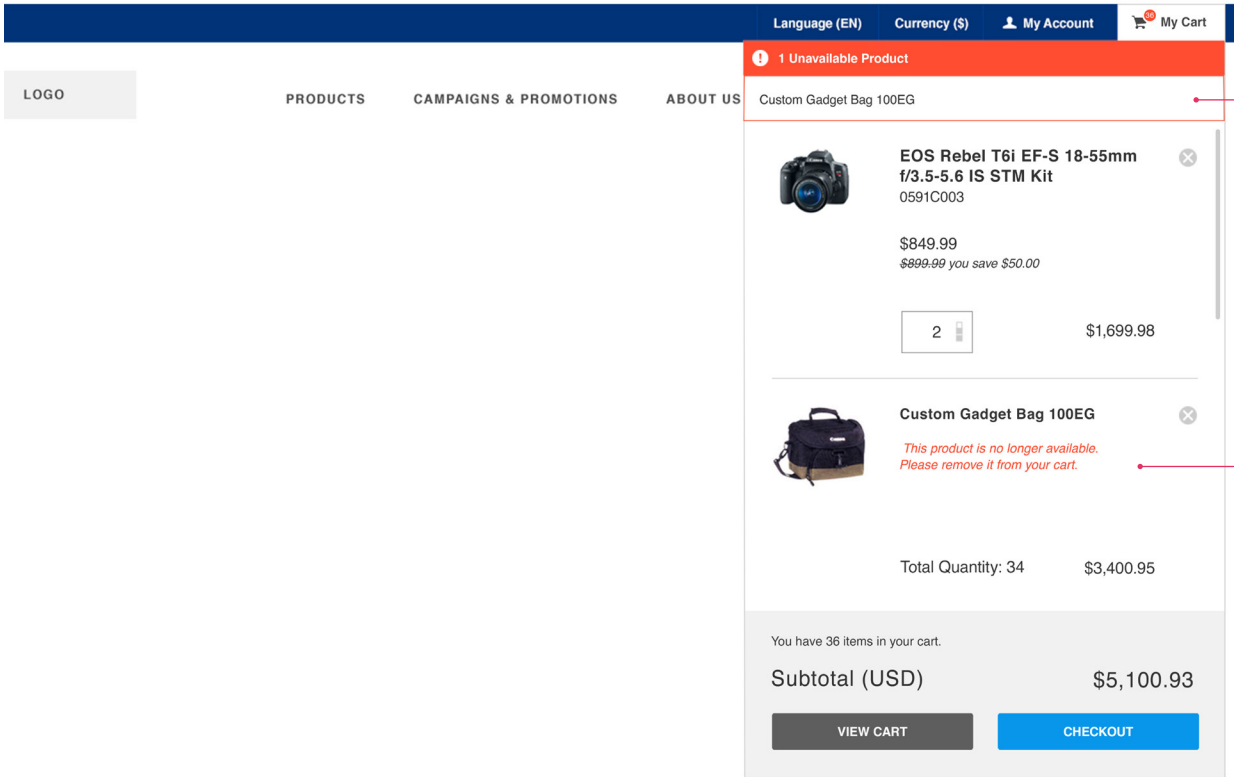

1440PX WIDE

- Mini-cart dropdown appears on click of icon, closes when user clicks icon or elsewhere on screen.
- Mini-cart has fixed maximum height and scroll bar allowing user to view all products in shopping cart.
- Individual product line item (product name, image, item number, individual price, quantity, total price), product name limited to 2 lines and truncated with ellipsis if necessary (full name displayed on product details page).
- Editable quantity field (optional configuration — can be made static depending on client preference).
- Display total quantity in cart.
- Takes user to shopping cart page on click.
- Subtotal for all products currently in cart, with indication of currency in which amount is displayed
- Takes user to the first step of the checkout process and bypasses the Shopping Cart page.

- Closes mini-cart and takes user to product catalog.

- Alert for unavailable products in shopping cart.
- In-line error message for unavailable item
